

We live in a country where we have freedom of speech. I am exercising that right to say that XM Radio is also exercising that right for its listeners to hear their local traffic and weather. Living in a large metropolitan area, it is vital to find out about traffic and weather problems. XM controls my programming. I pay them NOT the NAB. XM offers what I want. That is what I pay for. Since my money goes to them, they should control what I listen to. There is enough government control in our society now. we don't need them putting their grip on something else.
